Assignment 3 Analysis

Without provided context from relevant articles, how accurate are the responses from the various models? Use the no-context rows (contextLevel=0) to compare error rates.

Did providing the web resource with information about the bird species improve the accuracy of the provided common names and visual attributes? Compare contextLevel=0 against contextLevel=1.

Does submitting fewer queries, each with a larger amount of work, improve or reduce performance? Compare numSimultaneousQueries across 1, 8, 16, 32.
